Subject: Letter of recommendation

To whom it may concern

I have been Ivan's physics professor for 4 years, and during that period I got to know her and all her best attributes. In my opinion, Ivana made the right decision by applying for this study program because she is talented in the field of mathematics and physics. She studies physics with ease, she is burning with curiosity and she is the first to do her assignments. She is constantly trying to expand her knowledge in physics by reading books and watching science shows. The research she does on her own usually helps her when faced with a new task. Although she has had the mark excellent (5), she has shown the most interest in Astrophysics and Quantum mechanics. Not only that but she has chosen Quantum mechanics for her graduation thesis.

Ivana is energetic and confident. Her intelligence and ability to help others with physics are what sets her apart from others. She is the first to start discussions and with that increase the quality of the lesson. Working with Ivana is a source of inspiration.

I believe that through research work and high-quality studies, which you provide the opportunity for, Ivana, a hardworking student would give her best and develop her full potential.

Sincerely

Milica Drašković
